Rusty and dirty water may be experienced for a short time during and after flushing. If the water
appears dirty, leaving the tap open for several minutes following flushing should clear the pipes.

Prior to doing laundry, residents are advised to check this schedule.

This program is necessary to clean the distribution system of residual materials that normally settle out
in the mains during the year so as to ensure the delivery of better quality water during the coming
summer months.

CLIP AND SAVE

Per: Daniel O'Neill
Executive Director
